1. Applicant's amendment filed on 5/01/03 has been entered. Accordingly, claims 5 and 9 have been amended. Application is now in condition for allowance.

Allowable Subject Matter

2. Claims 1-10 are allowed.

The following is an examiner's statement of reasons for allowance: Applicant amendment and accompanying remarks has persuaded the examiner to place this application in condition for allowance. The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitation of the dependent claims, in such manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims, which include means mounting the focusing element for limited movement longitudinally of the axis between the housing and the workpiece, the element being operative to decrease the angle of incidence upon approaching the housing, and to increase the angle of incidence upon approaching the workpiece. This limitation in combination with an objective lens assembly disposed coaxially of the optical axis of an inspection device for projecting thereto an image of the illuminated surface of a workpiece spaced beneath and in registry with the assembly, a variable incidence oblique illuminator, including a housing, illuminating means in the housing for directing an expanded cone of illumination toward the workpiece coaxially of the optical axis, a focusing element positioned between the housing and the workpiece in the path of the cone coaxially thereof, and operative to redirect and focus the cone of illumination onto

the surface of the workpiece at a predetermined angle of incidence relative to the optical axis.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
